EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claim 7 line 5 "said connecting elements" have been changed to --said measuring elements-- as clearly indicated by the specification and the rest of the claims since the measuring elements are the only elements that pass freely through the recesses.

2. The following changes to the drawings have been approved by the examiner: Figures 1 and 2 as shown in WO 2004/033992 need to be provided. The figures are missing in the current application and the figures in WO 2004/033992 have been used for examination purposes. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

3. The following is an examiner's statement of reasons for allowance: The prior art does not disclose or teach a device and method for monitoring the state of the substructure of fixed track with a track plate having vertical recesses, the track plate on a substrate plate, and measuring elements which pass freely through the recesses and which are fastened to the substrate plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
